What is Open Science?

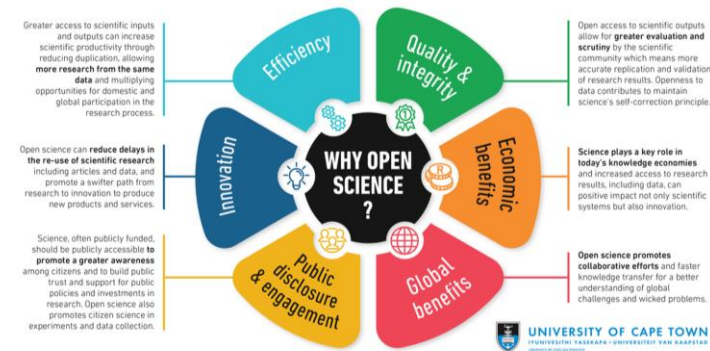

Open Science aims to make any academic output, be it data, publications or methods, accessible at any stage of the research process.

What is Open Science?

Open science is better science because:

- it has a broader impact
- more people can have their say
- we get paid for it
- it leads to smart decisions.

1. What is Open Science?
2. What is Open Access?
3. What is Open Data?
4. What is the Law?
5. What can I do?

What is Open Access?

Scholarly output is considered Open Access if it is «digital, online, free of charge, and free of most copyright and licensing restrictions»

P. Suber (2012), Open Access, MIT Press

Open-access.net

What is Open Access?

- 2015: Swiss Libraries spend 76 Millionen Swiss francs on licenses and fees for publishers.
- Researchers pay another 6 million CHF to publish results in scientific journals.

What is Open Access?

Who owns the knowledge generated
at universities?

Platinum/Diamond Open Access

The work will be made freely available directly and in its entirety to anyone worldwide. No APC will be charged to the authors. Creative Commons licences allow sharing and reuse.

Platinum/Diamond Open Access

Pros:

- Immediate Open Access
- No costs for authors

Cons:

- Platinum journals need institutional funding

Gold Open Access

Articles/books are immediately freely accessible. Article/Book Processing Charges (APC/BPC) levied. Creative Commons licences allow sharing and reuse.

Gold Open Access

Pros:

- Immediate open access

Cons:

- APC/BPC for authors
- False incentives for publishers
- Predatory journals

Gold Open Access

Predatory Journals charge “publication fees to authors without checking articles for quality”.

<https://thinkchecksubmit.org>

https://en.wikipedia.org/wiki/Predatory_publishing

Green Open Access

Work is first published traditionally in a subscription journal. Publishers then allow a version of the work to be published (usually after an embargo period) via a repository.

Green Open Access

Pros:

- No APCs

Cons:

- Advantage for subscribers (primeur)
- Publishers retain copyright

Hybrid Open Access

"Many journal publishers offer authors to buy out individual articles from traditional paid journals, which are then immediately open access."

<https://blog.hslu.ch/ikwerkzeugkasten/2018/09/10/wege-zu-open-access-gold-gruen-hybrid/>

Hybrid Open Access

Pros:

- Articles are immediately available open access

Cons:

- Hybrid leads to double dipping (APC and subscription costs).

What is Open Access?

2015: 33,600 publications/Switzerland

- 16% Green Open Access
- 11% Gold Open Access
- 3% Hybrid Open Access
- 70% Closed Access

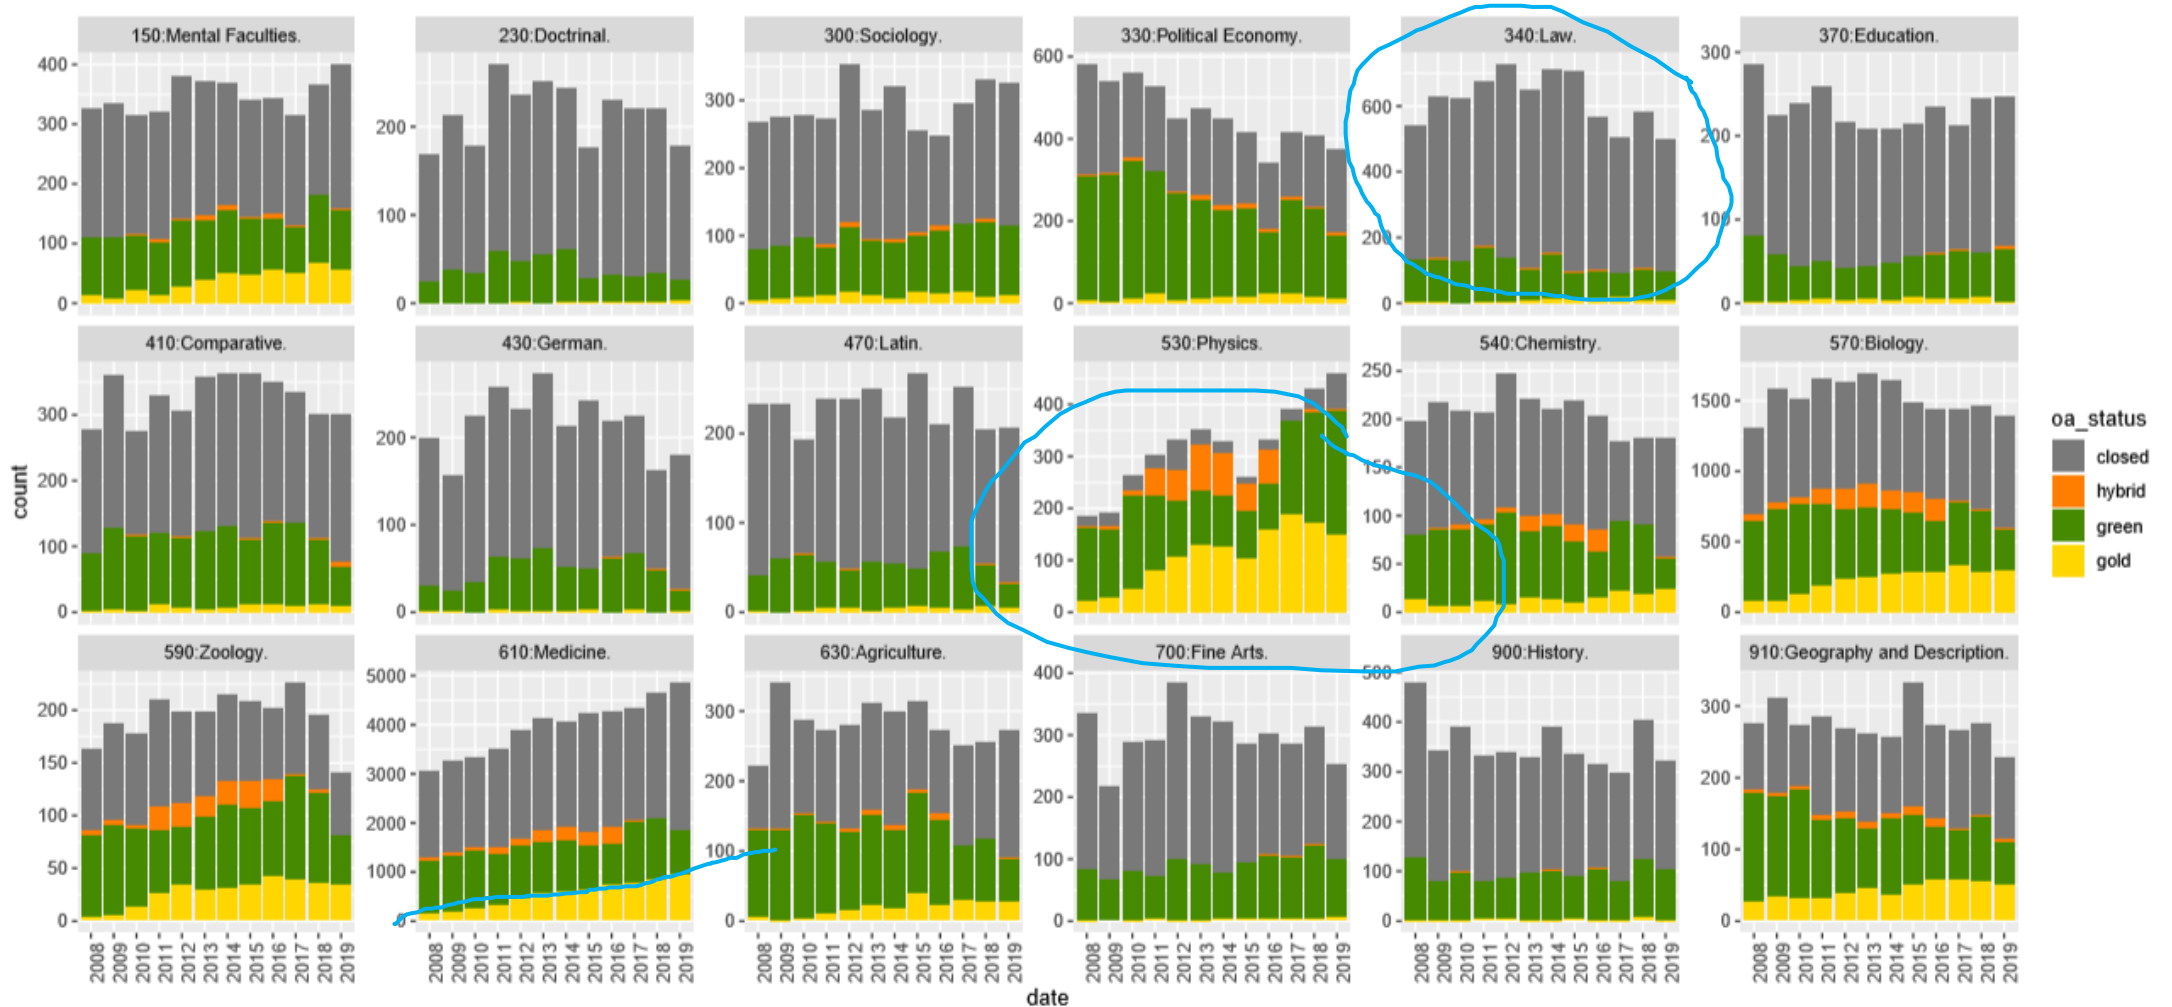

Financial Flows in Swiss Publishing (2016)

2. What is Open Access?
3. What is Open Data?
4. What is the Law?
5. What can I do?

What is Open Data?

Data is defined as “all digitally available information required to validate findings...”

UZH Open Science Policy/Glossary

What is Open Data?

Open data means making data available without restriction. UZH expects the research community to make research data as openly available as possible.

UZH Open Science Policy 2.2

What is Open Data?

- Data on which a publication is based should be openly accessible.
- Data should be shared at the time of first publication at the latest.
- Data should comply with good scientific and legal practice.
- Data must be FAIR (Findable, Accessible, Interoperable, Reusable)

UZH Open Science Policy 2.2

What is Open Data?

UZH provides support for Data Management (incl. planning, collecting, curation, modelling, storage, sharing, reuse) for all types of data... The support includes training and services.

UZH Open Science Policy 2.2

1. What is Open Science?
2. What is Open Access?
3. What is Open Data?
4. What is the Law?
5. What can I do?

Art. 20 Swiss Constitution – Academic freedom

Freedom of research and teaching
is guaranteed.

Freie Bahn für Open Access

Geteiltes Wissen • Die Verfassung und die Wissenschaftsfreiheit in der Schweiz lassen es zu, dass staatlich geförderte Forschungsergebnisse für jedermann kostenlos einsehbar sind.

Das im Urheberrecht verwurzelte Persönlichkeitsrecht eines Autors ist in den letzten Jahren durch verschiedene Gerichtsfälle bekannt geworden, so etwa kürzlich durch einen Entscheid des Bundesgerichts (BGfE 142 III 387 vom 19. April 2016). Dieses gab einem Waadtländer Ehepaar recht, das die Terrasse seiner Wohnvilla gegen den Willen des Architekten baulich anpassen wollte. Der Architekt machte vergeblich geltend, durch den Umbau werde sein Werk entstellt, was sein Urheber-

recht Anteil hat und ob dieser Anteil nicht auch verfassungsrechtlich geschützt ist. Diese Situation liegt in der Bundesrepublik Deutschland vor, wo das Urheberpersönlichkeitsrecht ebenfalls durch Artikel 2 Absatz 1 i. V. m. Artikel 5 Absatz 3 GG verfassungsrechtlich geschützt ist. Dieses schützt die Beziehung des Urhebers zu seinem Werk in umfassender Weise. Er kann demnach autonom entscheiden, ob er sein Werk überhaupt verwerten möchte, und wenn ja, in welcher Form. Bei dieser Rechtslage werden

geschützt werden, vom Anteil am verfassungsmässigen Schutz aus. In der Schweiz gibt es daher kein verfassungsrechtliches Urheberpersönlichkeitsrecht. Sollte der Gesetzgeber mittels Open-Access-Pflichten in die Urheberrechte von Wissenschaftlern eingreifen, so steht Artikel 10 BV nicht zur Verfügung. Es bleibt allein die Wissenschaftsfreiheit übrig. Die Wissenschaftsfreiheit (Artikel 20 BV) zählt als Kommunikationsrecht zwar zu den klassischen Freiheitsrechten und bildet eigentlich einen Sonderfall der Meinungsfreiheit und der persönlichen Freiheit. Sie unterliegt als Freiheitsrecht der Schrankenregelung des Artikels 36 BV. Damit lassen sich die allgemeinen Voraussetzungen von solchen Eingriffen, die gesetzliche Grundla-

Andreas Kley, plädoyer 3/18, 36 ff.

§ 65 Personnel Ordinance UZH

If university employees create a copyrighted work in the performance of their employment contract, they shall be entitled to the exploitation rights to this work.

**Personalverordnung
der Universität Zürich (PVO-UZH)**

(vom 29. September 2014)^{1,2}

Der Universitätsrat,

gestützt auf § 11 Abs. 2 des Universitätsgesetzes (UniG) vom 15. März 1998⁵,

What can I do?

With a CC BY license, the author permits use by others on the condition that the author and license are specified

We recommend: CC-BY-SA

<http://www.creativecommons.ch/wie-funktioniert/>

Open Access and copyrights

A Creative Commons license enables the free distribution of an otherwise copyrighted "work". A CC license is used when an author wants to give other people the right to share, use, and build upon a work that they have created.

Wikipedia

What can I do?

In many disciplines, research is evaluated by impact factors and citation indices, and positions are awarded according to these criteria.

What can I do?

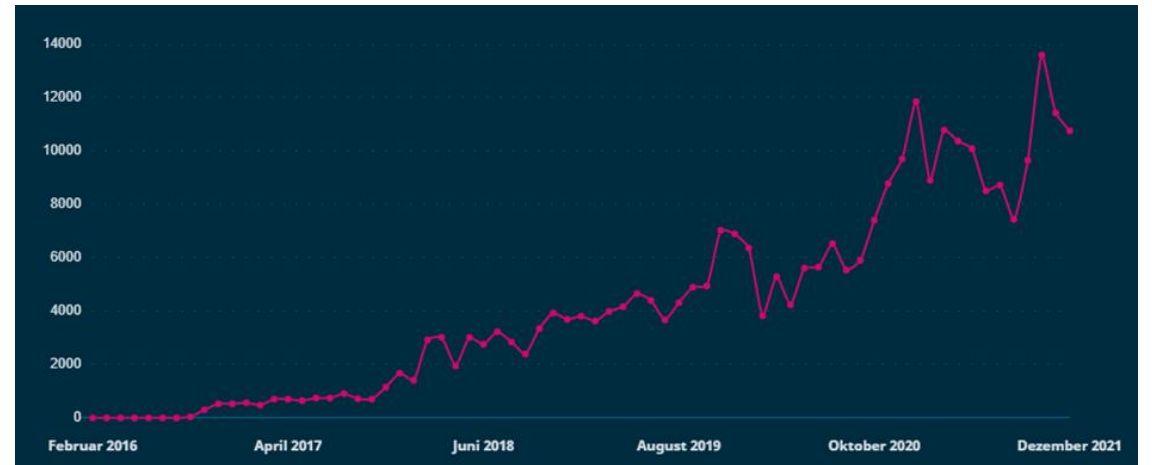

- Ask about open access publication opportunities.
- If immediate Open Access is not possible: Ask for a short embargo and publish Green Open Access

What can I do?

- If you are still driven by impact factors: By going Open Access you are betting on a winning horse
